

As meaningful use criteria for electronic health records head toward approval, one thing is clear: the ability to exchange clinical information and report on key quality measures will be a mandatory component of the 2011 requirements to qualify for incentive payments. The evolution of those requirements through 2013 and 2015 will raise the bar even higher. Mirth MUx is the simple way to enable your clinical HIT systems to meet these interoperability objectives.

Hospitals and Provider Organizations

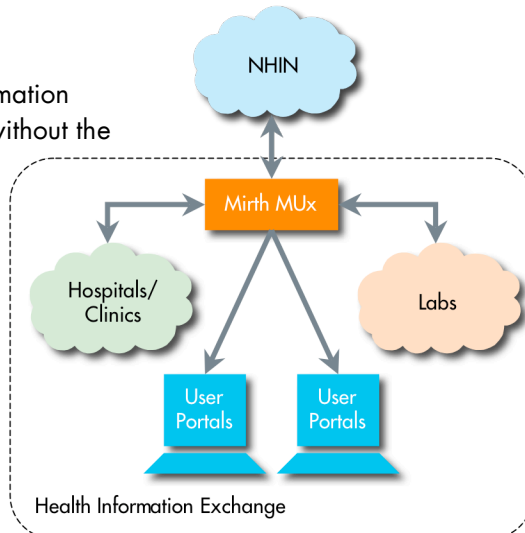

Mirth MUx Meaningful Use Exchange™ positions your organization ahead of the curve with rich data integration capabilities, and it does so in a fraction of the time and at a lower cost than alternative solutions. Using a proven combination of commercially supported open source technologies, Mirth MUx enables your existing systems to exchange clinical information internally and with outside organizations such as reference labs, health information

exchanges (HIEs), and the Nationwide Health Information Network (NHIN). Users can easily access clinical summaries, medication lists, lab results, and other records through a browser-based portal. They even can directly query NHIN information exchange partners for external clinical documents.

Health Information Exchange

Using Mirth MUx, many health information exchange use cases can be served without the need for an intermediary organization or technology stack. Mirth MUx can also be used by HIEs and other multi-entity organizations to quickly implement data exchange and NHIN interoperability. Provider portals can be made accessible via SSL or VPN and can be launched quickly and securely.

Mirth MUx Components

Mirth Connect	Leading open source healthcare data integration engine
Mirth Results	Clinical data repository and document portal
Mirth Match	HSSP-IS compliant master patient index
CONNECT	Federally sponsored open-source NHIN-enabled gateway
Mirth Appliance	Healthcare system administration and application management

Data Interfaces Supported

- CCD, HL7, X12
- Database, File/Text

Base Package Includes

- Mirth Hosted Appliances (2)
- Mirth MUx Production Instance
- Mirth MUx Test Instance
- Software License Subscription
- System Implementation
- Data Interfaces
- DURSA Consultation
- MUx Administrator Training
- Portal User Training
- Mirth Commercial Support
- 24/7 Emergency Response

Rapid Deployment

- Get up and running in as little as two weeks!

Call now for a detailed quote.
Solutions also available for HIT vendors.
